

AWAIS WAHEED

UX Designer • UI Designer • UI Developer

I'm a **Digital Product Designer** with hands on experience in **Front-end Development**. My skillset helps crafting well thought of and tested solutions for the problems in a product resulting in an optimised user experience. I have a passion for UX exercise, UI design and FE development and love to create strategically crafted wireframes/prototypes which lead to a polished and responsive user interface for the product.

EDUCATION

2009 Masters (New Media Art & Design)
University of West London

2002 Bachelors of Computer Science (BCS)
University of central Punjab, Lahore

MY DESIGN APPROACH

The approach I follow to overcome design challenges is normally built ad-hoc. This is shaped around the problem itself and touches upon all design process embrace all central phases of the HCD activities. The processes are often inspired by the standard double diamond model, the innovative Google design sprint, the recently revisited AJ&Smart design sprint and the useful IDEO design kit.
